

Flat Peyote Stitch (Even Count)

Many instructions and patterns are available at: <http://www.bead-patterns.com>

1. Pick up all beads for rows 1 and 2. I marked these with X's on my patterns. Leave a tail to weave in later. You may add a stop bead (keeps beads from falling off tail end until they become secure). Remove the stop bead when beads are stable.

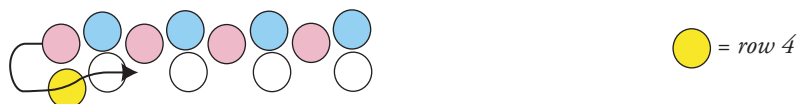

2. Row 3: Pick up one bead. Skip last bead in row 1. Insert needle through the last bead in row 2.

3. Repeat to end of row 3: Pick up one bead, skip a row 1 bead, insert needle through the next row 2 bead.

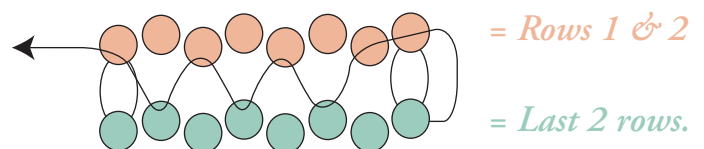

4. Row 4: As in row 3 you are filling in the holes. Repeat the above to finish.

Zippering the sides together:

1. Circle stitch the 2 end beads together.

2. Follow the path. Only going through the beads sticking out on either edge.

3. Circle stitch the other 2 end beads together to finish zipping up the sides.
